

Camden Keller

cak285@cornell.edu | (562) 475-8677 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Cornell University, Ithaca, NY | **GPA: 3.99**

Aug 2024 – May 2028

B.A. in Computer Science and Cognitive Science

M.Eng. in Computer Science (Accelerated), Expected May 2028

Relevant Coursework: Data Structures & Algorithms, Analysis of Algorithms, Computer Systems, Database Systems, Machine Learning, Discrete Structures, Functional Programming, Data Science, Linear Algebra

PROFESSIONAL EXPERIENCE

Lockheed Martin & General Dynamics

Jun 2026 – Aug 2026

Software Engineer Intern

Huntsville, AL

- Develop C2BMC software integrating sensor and interceptor systems for missile defense coordination
- Led sprint planning as interim Scrum Master; refactored classes for maintainability and test coverage

CMSX

Sep 2025 – Present

Software Engineer

Ithaca, NY

- Maintain Cornell's [course management system](#): 8,000+ students, 100+ courses, 100,000+ line codebase
- Revived dormant PeopleSoft Enrollment Sync project, developing JUnit and Selenium test suites
- Resolved authorization vulnerabilities, late-submission inconsistencies, and input validation issues

Cornell GreenClub

Feb 2025 – Present

Technical Lead (pathOS)

Ithaca, NY

- Lead full-stack development of [route optimization platform](#) reducing 10+ tons of CO₂ emissions annually
- Built physics-informed machine learning model to predict fuel consumption with less than 4% error
- Reduced AWS costs by 90% via Wake-on-Demand, using EC2 hibernation, Lambda, and EventBridge

SeaBridge Sustainability

May 2025 – Sep 2025

Software Engineer Intern

Seattle, WA

- Co-led 8-person team to deliver MVP of [enterprise RAG platform](#) to automate ESG reporting
- Architected data ingestion pipeline with AWS S3, Lambda, and MongoDB to process 5,000+ documents
- Shipped 5 LangGraph AI agents for data extraction and analysis, saving 400 analyst hours annually

TECHNICAL PROJECTS

TerminalTok

Nov 2025 – Dec 2025

- Built concurrent terminal-based [social platform](#) in OCaml for real-time messaging and media streaming
- Engineered hybrid recommendation engine using matrix factorization and collaborative filtering

Big Red Beli

Apr 2025 – May 2025

- Developed, containerized, and deployed [dining review backend](#) (Flask, SQLAlchemy, Docker, GCP)
- Designed 4 relational database models and 25 RESTful APIs, reducing average query time by 35%

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL, TypeScript, JavaScript, OCaml, Kotlin, HTML/CSS
- **Frameworks:** Flask, FastAPI, SQLAlchemy, React, Next.js, LangGraph, NumPy, Pandas, scikit-learn
- **Technologies:** AWS (EC2, Lambda, S3, EventBridge), GCP, Docker, Jenkins, MongoDB, Git, Postman

INTERESTS

- Water Polo (NY State MVP, captain), Surfing, Travel (77 countries), Sci-Fi Novels, Metal Music, Hiking
