

Camden Keller

cak285@cornell.edu | (562) 475-8677 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Cornell University, Ithaca, NY | **GPA: 3.99**

Aug 2024 – May 2028

B.A. in Computer Science and Cognitive Science

M.Eng. in Computer Science (Accelerated), Expected May 2028

Relevant Coursework: Data Structures & Algorithms, Analysis of Algorithms, Computer Systems, Database Systems, Machine Learning, Discrete Structures, Functional Programming, Data Science, Linear Algebra

PROFESSIONAL EXPERIENCE

Lockheed Martin (via General Dynamics)

Jun 2026 – Aug 2026

Software Engineer Intern – C2BMC (Missile Defense)

Huntsville, AL

- Eliminated processing errors across 30,000+ messages via multithreaded dynamic track scheduling
- Developed dependency-free custom XML parser classifying 500+ defense designs with 98% accuracy
- Architected logging infrastructure, increasing log coverage by 40% and accelerating root cause analysis

CMSX

Sep 2025 – Present

Software Engineer

Ithaca, NY

- Maintain Cornell's [course management system](#): 8,000+ students, 100+ courses, 100,000+ line codebase
- Revived dormant PeopleSoft Enrollment Sync project, developing JUnit and Selenium test suites
- Resolved authorization vulnerabilities, late-submission inconsistencies, and input validation issues

SeaBridge Sustainability

May 2025 – Sep 2025

Software Engineer Intern

Seattle, WA

- Co-led 8-person team to deliver MVP of [enterprise RAG platform](#) to automate ESG reporting
- Architected data ingestion pipeline with AWS S3, Lambda, and MongoDB to process 5,000+ documents
- Shipped 5 LangGraph AI agents for data extraction and analysis, saving 400 analyst hours annually

Cornell GreenClub

Feb 2025 – Present

Technical Lead (pathOS)

Ithaca, NY

- Led development of [route optimization platform](#) projected to reduce 10+ tons of CO₂ emissions annually
- Built physics-informed machine learning model to predict fuel consumption with less than 4% error
- Reduced AWS costs by 90% via Wake-on-Demand, using EC2 hibernation, Lambda, and EventBridge

TECHNICAL PROJECTS

TerminalTok

Nov 2025 – Dec 2025

- Built concurrent terminal-based [social platform](#) in OCaml for real-time messaging and media streaming
- Engineered hybrid recommendation engine using matrix factorization and collaborative filtering

Big Red Beli

Apr 2025 – May 2025

- Developed, containerized, and deployed [dining review backend](#) (Flask, SQLAlchemy, Docker, GCP)
- Designed 4 relational database models and 25 RESTful APIs, reducing average query time by 35%

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL, TypeScript, JavaScript, OCaml, Kotlin, HTML/CSS
- **Frameworks:** PyTorch, React, Next.js, NumPy, Pandas, scikit-learn, FastAPI, Flask, LangGraph
- **Technologies:** AWS (EC2, Lambda, S3, EventBridge), Docker, Git, CI/CD, Jenkins, MongoDB, Linux

INTERESTS

- Water Polo (NY State MVP, captain), Travel (77 countries), Surfing, Rock Climbing, Metal Music
